

Project Initialization and Planning Phase

Date	10 July 2026
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The Credit Card Approval Prediction System uses machine learning to evaluate applicant information and predict approval decisions. The goal is to reduce manual effort, improve consistency, and provide applicants with a faster and fairer approval process.

I am (Customer)	I'm trying to (get a credit card)	But (limited credit history)	Because (irregular income)	Which makes me feel (frustrated and anxious)
--------------------	--------------------------------------	---------------------------------	-------------------------------	---

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An individual applying for a credit card.	Get my credit card application approved quickly.	The approval depends on several financial and personal eligibility factors.	Banks must verify income, credit score, repayment history, existing loans and other risk factors before making a decision.	Uncertain and anxious about the final approval result.
