

Demonstration of Proposed Features

Date	10 July, 2026
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features proposed during the project planning phase and verifies whether they were successfully implemented and demonstrated in the Credit Card Approval Prediction system.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Applicant Data Input	Accepts applicant information through a user-friendly web interface.	Implemented	Yes	Successfully accepts user inputs.
2	Data Preprocessing	Cleans missing values, encodes categorical variables, and scales features before prediction.	Implemented	Yes	Improves model performance.
3	Machine Learning Prediction	Predicts whether a credit card application will be Approved or Rejected using the trained model.	Implemented	Yes	Random Forest model integrated successfully.
4	Prediction Result Display	Displays the approval prediction instantly on the web	Implemented	Yes	Provides real-time prediction results.

5	Model Performance Evaluation	Evaluates the trained model using Accuracy, Precision, Recall and F1-Score.	Implemented	Yes	Performance metrics displayed successfully.
---	------------------------------	---	-------------	-----	---

6	Flask Web Application Deployment	Integrates the trained model into a Flask-based web application for real-time use.	Implemented	Yes	Successfully demonstrated end-to-end workflow.
---	----------------------------------	--	-------------	-----	--

Feature Implementation Summary

Feature	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
